COVID-19 Statistics
As at 30 May 2022
A Management Information release for Scotland
Publication date: 01 June 2022

About this release
This weekly release by Public Health Scotland presents data on COVID-19 across NHS Scotland.

Main Points

- In the week ending 29 May 2022, there were 6,150 reported COVID-19 cases, a decrease of 0.7% from the previous week

- In the week ending 29 May 2022, 828 (13.5%) of all cases reported that week were determined to be reinfections when applying the 90-day threshold

- In the latest week ending 24 May 2022, the number of new COVID-19 admissions to hospital fell from 420 to 364 (13.3%) from the week ending 17 May 2022. The highest number of admissions are now in those aged 80+ (25.5%)

- In the week ending 29 May 2022 there were 12 new admissions to Intensive Care Units (ICUs) with a laboratory confirmed test of COVID-19
Wider Impact Analysis

The response to the COVID-19 pandemic is likely to have a wider impact on health and care as a result of the lockdown, economic pressures and changes to health services.

Background

Since the start of the outbreak, Public Health Scotland (PHS) has been working closely with the Scottish Government and health and care colleagues to support the surveillance and monitoring of COVID-19 amongst the population. There is a large amount of data being regularly published regarding COVID-19 (for example, Coronavirus in Scotland – Scottish Government and Deaths involving coronavirus in Scotland – National Records of Scotland). This report complements the range of existing data currently available.
